

[KEJRIWAL GEOTECH PVT LTD (Textile Industry)]

Location: Surat, Gujarat (India)

Year of Project 2019-20

TEXTILE SECTOR APPLICATION

Textile industries have CP(Continuous Polymerization), POY (Partially Oriented Yarn) and FDY (Fully Drawn Yarn) process. Heat Source can be steam, Hot Water from HTM, zero pressure steam from CP, exhaust from power generation. This heat source can be used to generate Cooling for POY and FDY process. In the case of Kejriwal Industries, after CP 0kg steam produced that is of no use for the plant. Chiller takes steam as heat source to provide cooling for POY and FDY process.

Chiller details

Single stage Steam Chiller –

Cooling Capacity: 800TR*1 + 400TR*1

Heat Source: Steam after CP

Model:

BDS121XIII-0.0-38/33-7/12-200

BDS242XII-0.0-38/33-7/12-400

UNIQUE VALUE TO CUSTOMER

Customer will save around 850kW per hour electricity consumption and price side 55million on electricity bill for a year. While payback period is just 7 months.
